

The Art Tours organised by the Hong Kong Art School centre upon the Art in Experience rationale. We believe that travelling experience leads to a more in-depth observation of the surrounding environment and a more substantial understanding of life, it is hence essential in the context of art study, which aims to open up a wider horizon and a more sophisticated realm for individuals to sense, to explore, to perceive, to express, and to enrich spirituality. Our Japan Art Tour will be back again in this July during the summer session of the Setouchi Triennale, you will be visiting the top-ranked museums and cultural sites on some of the major Seto Islands, including those breath-taking architectures by Tadao Ando, and you may have a close encounter with our artist-alumni who will be taking part in the Triennale!

No matter if you are acquainted with Japan and its cultural attractions or not, it is only the Japan Art Tour organized by Hong Kong Art School that can provide you with a unique travelling experience which no other tour can match! This is also a unique art tour in town that can guide you through the artistic and cultural explorations across different regions of Japan in one go!
